Supplementary Table S2. Multivariable analysis on local control rate with Fine-Gray subdistribution hazards model

Factor	Subhazard ratio	95% CI	p-value
Age	1.005	0.961–1.051	0.833
Sex (female vs. male)	0.950	0.442–2.041	0.895
Indication for radiotherapy (oligoprogression/oligopersistence vs primary tumor)	0.720	0.288–1.799	0.482
Tumor size (per cm)	1.055	0.891–1.249	0.532
Radiotherapy technique (VMAT vs. 3D-conformal)	1.463	0.430–4.980	0.543

CI, confidence interval; VMAT, volumetric arc therapy.
