Supplementary Table S3. Multivariable analysis on overall survival with Cox regression

Factor	Hazard ratio	95% CI	P-value
Age	1.002	0.924–1.086	0.962
Sex (female vs. male)	0.401	0.100–1.609	0.197
Indication for radiotherapy (oligoprogression/oligopersistence vs primary tumor)	0.556	0.139–2.220	0.406
Tumor size (per cm)	1.002	0.783–1.281	0.990
Radiotherapy technique (VMAT vs. 3D-conformal)	1.132	0.199–6.443	0.889

CI, confidence interval; VMAT, volumetric arc therapy.
